

You've installed your Prince On-Board Computer and you're ready to enjoy informative, efficient driving. You're probably wondering what to do first?

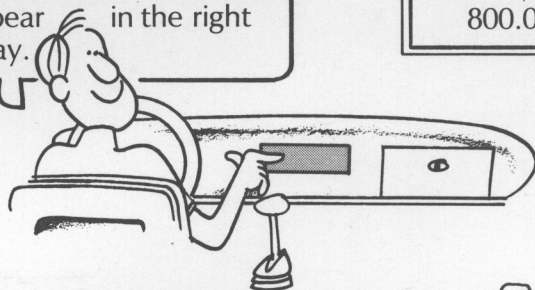

- 1 First, turn your computer on by sliding the **"ON-OFF"** switch to **"ON"**.

- 2 Slide the **"MILE-KM"** switch to **"MI"**. Slide the **"NORM-CAL"** switch up to **"NORMAL"** mode.

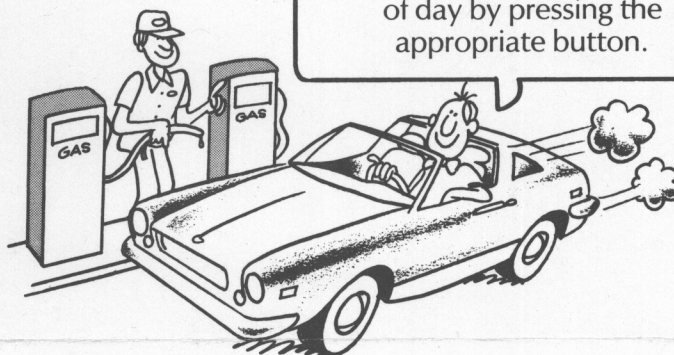

- 3 Now you are ready to **"ENTER"** information into your computer. Let's start with the **"TIME OF DAY"**. If it is 11:30 you would press 1 1 3 0 **"ENTER"** and then press **"TIME"**. 11:30.01 and counting will appear in the right hand display.

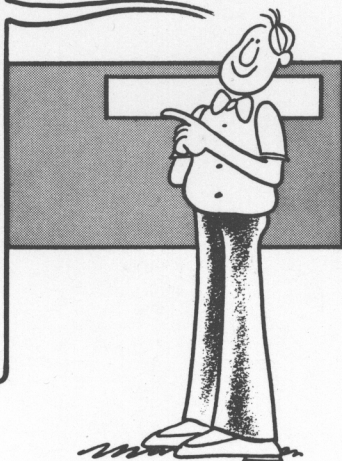

- 4 Until you **"CALIBRATE"** or fine tune your computer enter the average calibration number, 800.0. Press 8 0 0 0, press **"ENTER"** and then press **"CAL"**. 800.0 will now appear in the right display. *

- 5 Drive to a gas station to fill-up, and as you are driving your computer will already be working. It will tell you your speed, instant miles per gallon and time of day by pressing the appropriate button.

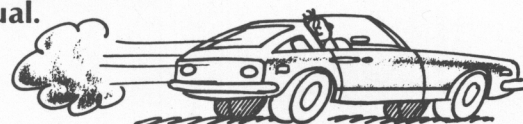

- 6 After you fill-up, you will **"ZERO"** out any accumulated data now in your computer for distance on tank and fuel used. This is done by pressing the **"0"** button twice, press **"ENTER"**, and then **"DIST"**, repeat for **"FUEL USED"**. Now enter the price paid per gallon. If it was 64.9 you would press 6 4 9 then **"ENTER"** and **"COST"**.

- 7 If you know it, enter the exact distance from the gas station to your home, otherwise estimate it. If it was 12.5 miles you would press 1, 2, 5, **"ENTER"** and then press, **"DIST TO GO"**.

- 8 On your way home you will have at the push of a button this information: (estimated time of arrival), **"ETA"**, **"DIST TO GO"**, **"DIST"** (traveled on tank since fill up), **"SPEED"**, **"INST"** and **"AVG" MPG**, **"INST"** and **"AVG" COST/MI**, **"FUEL USED"** and **"TIME"**.

* 800.0 is only an average calibration number for American made vehicles. See Owner's Manual.

This is only half of what you and the Prince On-Board Computer can do. When you get home take the time to read through the owner's manual and discover the age of total driving information.
